NEWS – AUXILIARY ENGINES FAILURE ON LAKE ERIE

Dear Madam, dear Sir,

Please note that we have been advised that the vessel Lake Erie (bulk carrier), while en route from Port Gentil (Gabon) port to La Pallice port (France), suffered auxiliary engines failure. According to Groninger Welke Janssen, adjusters, shipowners contracted a tug and towage to Abidjan on 30/12/24. Repairs are now completed, and vessel is currently located off Senegal, under way to La Palmas (Spain).

Shipowners declared General Average, and instructed Groninger as adjusters.

CESAM is already handling a claim on behalf of one Insurer, related to this vessel within the Major Casualties department.

If you insure or reinsure cargo on board and need assistance managing general average claims, feel free to contact us.
