Earthquake in South East Turkey / North & North West Syria

We sadly inform you that on 06.02.2023 Earthquakes of magnitudes 1st of 7.7, 2nd of 6.6 and 3rd of 6.4, struck South East Turkey, the first being at 03:17 local time, also affecting the North and West of Syria (Aleppo, Latakia and Hama Cities) causing the collapse of over 100 buildings and the death toll (until last night) is over 2000 people as well as thousands still trapped as rescue teams are trying to help them.

The Center of the Earthquake is in South East Turkey at the Syrian Border, 60 km from Aleppo City and 160 km from our main Port City of Lattakia.

In Syria

Main Roads are still functioning

Main Ports are still functioning

Main Airports are still functioning

As for Turkey, the South East part is badly affected and the Port of Iskenderun is closed, Vessels are asked to move to anchorage, main roads in the South part of Turkey are affected as well.

For More information you can contact us any time.
